

The Vaccine (Dis)Information War

by

C.J. Hopkins

on

[Off Guardian](#)

So, good news, folks! It appears that GloboCap's Genetic Modification Division has come up with a miracle vaccine for Covid!

It's an absolutely safe, non-experimental, messenger-RNA vaccine that teaches your cells to produce a protein that triggers an immune response, just like your body's immune-system response, only better, because it's made by corporations!

OK, technically, it hasn't been approved for use - that process normally takes several years - so I guess it's slightly "experimental," but the US Food and Drug Administration and the European Medicines Agency have issued "Emergency Use Authorizations," and it has been "tested extensively for safety and effectiveness," according to Facebook's anonymous "fact checkers," so there's absolutely nothing to worry about.

This non-experimental experimental vaccine is truly an historic development, because apart from saving the world from a virus that causes mild to moderate flu-like symptoms (or, more commonly, no symptoms whatsoever) in roughly 95% of those infected, and that over 99% of those infected survive, the possibilities for future applications of messenger-RNA technology, and the genetic modification of humans, generally, is virtually unlimited at this point.

Imagine all the diseases we can cure, and all the genetic "mistakes" we can fix, now that we can reprogram people's genes to do whatever we want ... cancer, heart disease, dementia, blindness, not to mention the common cold!

We could even cure psychiatric disorders, like "[antisocial personality disorder](#)," "[oppositional defiant disorder](#)," and other "[conduct disorders](#)" and "[personality disorders](#)."

Who knows? In another hundred years, we will probably be able to genetically cleanse the human species of age-old scourges, like racism, sexism, anti-Semitism, homophobia, transphobia, etcetera, by reprogramming everyone's defective alleles, or implanting some kind of nanotechnological neurosynaptic chips into our brains.

The only thing standing in our way is people's totally irrational resistance to letting corporations redesign the human organism, which, clearly, was rather poorly designed, and thus is vulnerable to all these horrible diseases, and emotional and behavioral disorders.

But I'm getting a little ahead of myself.

The important thing at the moment is to defeat this common-flu-like pestilence that [has no significant effect on age-adjusted death rates](#), and [the mortality profile of which is more or less identical to the normal mortality profile](#), but which has nonetheless left the global corporatocracy no choice but to "lock down" the entire planet, plunge millions into desperate poverty, order everyone to wear medical-looking masks, unleash armed goon squads to raid people's homes, and otherwise transform society into a pathologized-totalitarian nightmare.

And, of course, the only way to do that (i.e., save humanity from a flu-like bug) is to [coercively vaccinate every single human being on the planet Earth!](#)

OK, you're probably thinking that doesn't make much sense, this crusade to vaccinate the entire species against a relatively standard respiratory virus, but that's just because you are still thinking critically. You really need to stop thinking like that. As *The New York Times* [just pointed out](#):

critical thinking isn't helping."

In fact, [it might be symptomatic of one of those "disorders" I just mentioned above](#).

Critical thinking leads to "vaccine hesitancy," which is why [corporations are working with governments to immediately censor any and all content that deviates from the official Covid-19 narrative](#) and [deplatform the authors of such content](#), or discredit them as "[anti-vax disinformationists](#)."

For example, [Children's Health Defense](#), which has been reporting on so-called "adverse events" and deaths in connection with the Covid vaccines, despite the fact that, according to the authorities, "[there are no safety problems with the vaccines](#)" and "[there is no link between Covid-19 vaccines and those who die after receiving them](#)."

In fact, according to the "fact-checkers" at Reuters, these purported "reports of adverse events" "[may contain information that is incomplete, inaccurate, coincidental, or unverifiable!](#)"

Yes, you're reading between the lines right.

The corporate media can't come right out and say it, but it appears the "anti-vax disinformationists" are fabricating "adverse events" out of whole cloth and hacking them into the [VAERS database](#) and other such systems around the world.

Worse, they are somehow infiltrating these made-up stories into the mainstream media in order to lure people into "vaccine hesitancy" and stop us from [vaccinating every man, woman, and child in the physical universe](#), repeatedly, on an ongoing basis, for as long as the "medical experts" deem

necessary.

Here are just a few examples of their handiwork...

1. In Norway, [23 elderly people died after receiving the Pfizer vaccine](#). However, according to Reuters' "fact-checkers," it turns out, old people just die sometimes, especially in nursing homes, from a variety of causes ... unless they haven't been vaccinated, in which case they definitely died of Covid, regardless of what they actually died of. For example, [a 99-year-old man suffering from dementia and emphysema, who tested negative for the virus three times, was added to the "Covid deaths" figures](#) because a nursing home doctor "assumed" it was Covid (which GloboCap has [expressly instructed](#) him to do).
2. In Germany, [13 of 40 residents of one nursing home died after being vaccinated](#), but this was just a "tragic coincidence," which had absolutely nothing to do with the vaccine.
1. In Spain, in another "tragic coincidence," [46 nursing home residents who received the Pfizer-BioNTech vaccine died within the course of one month](#). A further 28 of the 94 residents and 12 staff members subsequently tested positive.
2. In Florida, [a healthy middle-aged doctor died from an unusual blood disorder two weeks after receiving the vaccine](#), but, according to the experts, the sudden onset of this rare immunological blood disorder (i.e., immune thrombocytopenia) "should not be interpreted as linked to the vaccine," and was probably just a total coincidence.
3. In California, a 60-year-old X-ray technologist received a second dose of the Pfizer vaccine. A few hours later he had trouble breathing. He was hospitalized and [died four days later](#). His widow says she's not ready at this point to link her husband's death to the vaccine. "[I'm not putting any blame on Pfizer](#)," she said, "or on any other pharmaceutical company." So, probably just another coincidence.
4. [A 78-year-old woman in California died immediately after being vaccinated](#), but her death was not related to the vaccine, health officials assured the public. "(She) received an injection of the Covid-19 vaccine manufactured by Pfizer around noon. While seated in the observation area after the injection, [she] complained of feeling discomfort and while being evaluated by medical personnel she lost consciousness." Despite the sudden death of his wife, her husband intends to receive a second dose.
5. [A former Detroit news anchor died just one day after receiving the vaccine](#), but it was probably just a coincidental stroke, which the "normal side effects of the vaccine may have masked."
6. Also in Michigan, [a 90-year-old man died the day after receiving the vaccine](#), but, again, this was just a tragic coincidence. As Dr. David Gorski explained, "the baseline death rate of 90-year-olds is high because they're 90 years old," which makes perfect sense ... unless, of course, they died of Covid, in which case their age and underlying conditions make absolutely no difference whatsoever.
7. In Kentucky, [two nuns at a monastery died, and more than two dozen others tested positive, in a sudden "Covid-19 outbreak" that began two days after the nuns were vaccinated](#). The monastery had been completely closed to visitors and Covid-free up to that point, but the nuns were old and had "health issues," and so on.
8. In Virginia, [a 58-year-old grandmother died within hours after receiving the vaccine](#), but, as Facebook's "fact checkers" prominently pointed out, it had to be just another coincidence, because the "vaccines have been tested for safety extensively."

WTKR.COM

No autopsy performed after Gloucester woman's death minutes after receiving Pfizer vaccine

Approved COVID-19 vaccines have been tested extensively for safety and effectiveness.

And then there are all the people on Facebook sharing their stories of loved ones who have died shortly after receiving the Covid vaccine, who the Facebook "fact checkers" are doing their utmost to discredit with their official-looking "fact-check notices." For example...

17 February at 21:28 · 🌐

My heart is broken. This is a pain I knew I would have to face one day and I knew it would be one of the hardest things to face. We had to say "see you later" to my dad yesterday. He was one of my absolute favorite people and he knew it. He was my best friend. He was the one I would call if I was going through something like this and I would say "Dad, what am I supposed to do" I would just call sometimes to hear his voice. I will miss his voice. He was an amazing dad and an amazing grandpa. People want to know what happened. I will tell you so you know, but we are processing through this. He got the vaccine yesterday morning, had a headache after so he laid down to take a nap and he never woke up.

I have the blessed assurance of where he is. He loved God and he loved Jesus. So yesterday was a glorious day for him. He got to meet Jesus and God face to face. He is dancing and rejoicing. And though this is one of the most painful losses I will face, I too have that same hope and I will see him again someday.

Approved COVID-19 vaccines have been tested extensively for safety and effectiveness.

OK, I realize it's uncomfortable to have to face things like that (i.e., global corporations like Facebook implying that these people are lying or are using the sudden deaths of their loved ones to discourage others from getting vaccinated), especially if you're just trying to follow orders and parrot official propaganda ... even the most fanatical [Covidian Cultists](#) probably still have a shred of human empathy buried deep in their cold little hearts.

But [there's an information war on, folks!](#)

You're either with the Corporatocracy or against it! This is no time to get squeamish, or, you know, publicly exhibit an ounce of compassion. What would your friends and colleagues think of you?!

No, report these anti-vaxxers to the authorities, shout them down on social media, switch off your critical-thinking faculties, and get in line to get your vaccination! The fate of the human species depends on it!

And, if you're lucky, maybe GloboCap will even give you one of these nifty numerical Covid-vaccine tattoos for free!
